sinto WELLNESS CREATION

for the Better

Automatic Mode

When the device's center is pointed at the pipe, it will automatically calculate and display the appropriate colors for detection.

Manual Mode

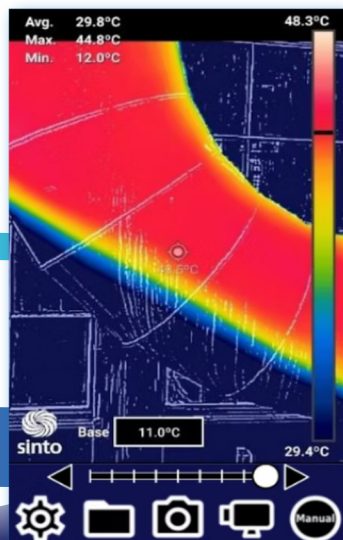

Users can freely set the color-changing temperature distribution values.
Avg. 29.6°C Max. 46.9°C Min. 23.8°C

Features of Our Detection App

1. Color Shade Change within Temperature Range: The app can change its color shade within a specific temperature range on the color bar.
2. Adjustable Sensitivity: You can adjust the sensitivity of the detection.
3. Configurable Categories: Each type or category of detection can be individually configured.
4. View Photos and Videos: You can review captured photos and videos.
5. Photo Capture: The app can take photos.
6. Video Recording: The app can record videos.
7. Switch Detection Modes: You can change between different detection modes.
8. Freely Adjustable Temperature Range: The upper and lower values of the temperature range can be adjusted independently.

Examples

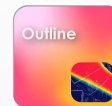

Dust Accumulation Detection Device vs. General Infrared Camera Usage

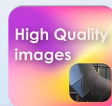

User-friendly for in-pipe dust inspection.

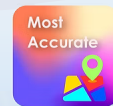

The device is portable and easy to use.

The outline view uses color to clearly differentiate temperatures.

Clear images with a high-resolution camera.

It can detect even when surrounded by objects with low or high temperatures.
